

AGRICULTURAL COLLEGE OF UTAH

EXPERIMENT STATION.

J. A. WIDTSOE, B. S., CHEMIST.

Logan, Utah, May 28th 1898

The First Presidency,
Church of Jesus Christ of Latter Day Saints.
Dear Brethren:-

I have sent on, to-day,
the manuscript concordance to the Book
of Doctrine and Covenants: it will reach
you, I hope, within a day or two of the receipt
of this letter.

The general outline of the work will
be found in the notes pasted on the
inside of the doors of the case.

My notes are carefully preserved and
will enable any change that may be
thought desirable to be made with a
minimum expenditure of time and
energy.

I shall always be glad to correct,
improve or add to the work in any way,
so as to make it more useful.

The motive of my work has been

to aid all those who love and study
and teach the Gospel. If, by using
this concordance, you find that I have
succeeded in this, I shall be very happy.

Very respectfully
J. A. Widsøe.

P.S. The keys to the case are enclosed
in this letter.
