

Agricultural College of Utah.

EXPERIMENT STATION.

J. A. WIDTSOE,

CHEMIST.

Logan, Utah, May 1st 1898

Geo. F. Gibbs,
Salt Lake City.

Dear brother Gibbs:—

President

Tanner handed me a sample from you to be assayed, several weeks ago. The work was overlooked for several "runs", and the report is therefore late.

The sample proved very difficult to handle; but the various processes to which it was subjected failed to reveal the slightest trace of gold or silver.

If you desire to know its value in regard to any other ingredient I shall be glad to make the necessary tests.

Very respectfully
J. A. Widsøe.
